Synopsis book

Brandon Sanderson creates worlds, and those worlds are linked. His universe spans the Stormlight Archive, the Mistborn series the tales of Elantris, and others, comprising a unique constellation of vividly imagined realms known as the Cosmere. Now for the first time anywhere, stories representing each of these planets, and their fully realized and distinct magic systems, have been collected in a single spectacular volume. Arcanum Unbounded: The Cosmere Collection brings together tales spanning the known limits of Sanderson's universe--including the never-before-published Edgedancer, a thrilling new novella of the Stormlight Archive--along with charts, illustrations, notes...and secrets. The Cosmere Collection encompasses six worlds in all, explored across nine astonishing works of short fiction: Sel ("The Hope of Elantris" and The Emperor's Soul); Scadrial ("The Eleventh Metal," "Allomancer Jak and the Pits of Eltania, Episodes Twenty-eight Through Thirty," and Mistborn: Secret
